

SITI NUR AZIZAH

Muara Enim, ID | +6281263576330 | sitinurazizahhh18@gmail.com | [linkedin.com/in/azizeeey](https://www.linkedin.com/in/azizeeey)

An Informatics Engineering graduate specializing in software engineering and system development. Experienced in full-cycle web application projects at LLDIKTI Region II, covering system analysis, design, implementation, software testing, and deployment using Laravel and MySQL on cloud hosting. Skilled in developing structured, scalable, and data-driven systems supported by analytical tools such as SQL, Excel, and Power BI. Adept at applying Agile–Kanban methodologies (Trello) for project management and maintaining clean technical documentation. With a strong foundation in both frontend and backend development, I'm eager to contribute to building reliable, efficient, and secure digital solutions in a collaborative environment.

Education

University Of Lampung

Informatics Engineering, Bachelor Of Engineering, GPA 3.85/4.00 (Cumlaude).

Aug 2021 – Jul 2025

Work Experiences

University Of Lampung

Treasurer | Laboratory Assistant of Digital Engineering Laboratory

Oct 2022 – Jul 2025

- Managed financial administration for 4 generations of laboratory assistants.
- Taught and assessed ± 100 students per semester in Digital Engineering, Digital Electronics, and Embedded Systems practicums.
- Assisted lecturers in preparing 3 practicum modules and evaluating ± 100 students to ensure effective delivery and assessment.

LLDIKTI Wilayah II

Software Engineer

Oct 2024 – Jun 2025

- Developed a Laravel-based KIP Scholarship Management System for 166 universities, covering the end-to-end process
- Performed 2 testing methods (Blackbox & UAT) to ensure system quality, achieving 100% success in Blackbox testing and an 80% approval rate in User Acceptance Testing (UAT)
- Coordinated with LLDIKTI operators and 3 university operators during system implementation.
- Managed project tasks and monitored development progress using Trello to ensure timely completion.

Front End Web Developer

Feb 2024 – Jun 2024

- Designed and prototyped the redesigned website interface, focusing on usability and modern UI principles, resulting in a 25% improvement in user satisfaction or efficiency.
- Translated 10+ wireframes and prototypes into responsive front-end code using HTML, CSS, and JavaScript, enhancing user experience and reducing development time by 25%.
- Collaborated with the team to integrate design with functionality, ensuring consistency and user-friendly interaction for 2 projects and achieving measurable improvements in user satisfaction and workflow efficiency.

Mabelas Development

System Analyst

Apr 2024 – Jun 2024

- Conducted system requirements analysis by gathering data from users and stakeholders, resulting in improved process efficiency by 20% and more accurate project specifications.
- Designed workflow diagrams and system specifications that enabled the development team to streamline processes, reducing project turnaround time by 30%.
- Collaborated with a team of 4 developers to ensure system solutions met functional and business needs.

Bangkit Academy led by Google, Goto, and Traveloka

Cloud Computing Cohort

Aug 2023 – Jan 2024

- Completed 900+ hours of intensive training in cloud computing, back-end, and DevOps.
- Developed 1 capstone project with a 7-member team using Google Cloud.

Organizational Experiences

Himpunan Mahasiswa Teknik Elektro (HIMATRO)

Member Of Pengembangan Keteknikan

May 2022 – Dec 2023

- Member of Pengembangan Keteknikan, contributed to 2 divisions: Research & Development and Community Service.
- Led the Publications, Decorations, and Documentation (PDD) team as Head Coordinator in Electrical Engineering in

Action 2023, HIMATRO Unila's largest annual event, overseeing planning, budgeting, and media publication.

- Delivered presentations to 10+ high school students in Lampung during the regional-level EGOS 2023, representing HIMATRO Unila and promoting Electrical Engineering career awareness.
- Collaborated with 20+ team members to organize workshops and academic events, including the PKM Seminar and HIMATRO Research Competition (HRC), attended by 200+ participants.
- Contributed as an Event Committee Member in the HIMATRO 2023 Anniversary, leading concept development, coordination with partners, and end-to-end event planning and documentation to ensure successful execution.

Portfolio

SIM KIP : Digitalisasi Pengelolaan KIP Kuliah Merdeka Berbasis Metode Kanban Dengan Laravel (Studi Kasus : LLDIKTI Wilayah II)

Developed a web-based system to digitize the management of KIP Kuliah Merdeka, covering processes from student submission, verification, and disbursement. Implemented Kanban methodology for project management and Laravel framework for system development, with deployment on cloud hosting. Link : <https://kipkuliahlldikti2.web.id/>

To Do List Manager

This application allows users to efficiently manage their daily tasks. It goes beyond a simple to-do list by incorporating features like sub-tasks, progress tracking, and persistent storage.

Link : <https://azizeeey.github.io/CodingCamp-13Oct2025-SitiNurAzizah/>

NuTrace – A Nutrient Tracing Solution for Healthy Living

Built an integrated Bangkit Capstone Project combining ML, Cloud, and Mobile to deliver personalized meal tracking and nutrition recommendations.

Bookshelf-API

A lightweight API built with Node.js to manage book data. Implements full CRUD operations with a modular architecture separating server configuration, routing, request handlers, helper utilities, and in-memory data storage. Enforced code quality and consistency through ESLint with Airbnb base rules.

LibyDoor – Digital Library Information System

Created a web-based system for managing book borrowing, returns, and nes using Angular and TypeScript, improving efficiency and usability.

Car Rental Website – Lampung Online Car Booking System

Developed a web-based platform for car browsing, booking, and management with separate admin and user modules for streamlined access.

SLiMS – Online Library System for SMK 2 Mei Bandar Lampung

Implemented and deployed SLiMS-based library system with VPS and domain setup, enabling online access to collections and lending activities.

UI/UX Design Xaca Music

Create a mockup of Xaca Music display, redesign spotify app.
